

Target Demographic: Action

Target ESRB: T for Teen

Target Platform: PC

Overview

Cyborne is an Action/ Survival Horror game where the player must find a way to the exit button. There are undead aliens, and other extraterrestrial threats.

Cyborne will have 4 Levels. As the player plays through the game, they will unlock upgrades that will devastate the hordes in front of them, with flesh piercing plasma, and a laser ray to keep any enemy where it stands.

Players will take the shoes of an un-named Security Cyborg that shoots lasers out of his brain.

The game will feature a room system, detecting how long players have been in a room. The longer the Player resides in a room, the more aware the enemy will be of your presence.

As security, it is your goal to find out what is going on, and to find a way to warn humanity of what lurks on the station.
